terri.bell@intertec-inst.com

For special dietary needs, contact the Sarnia Golf & Curling Club three days prior to the meeting.

NOTE: ALL Members and Guests are requested to reserve in advanced.

PRESENTATION

January Speaker

Cathy MacLellan Bio:

As a graduate in Health Studies (University of Waterloo, B.Sc. Co-op, 1985) Cathy intuitively sees the connections between food, air, energy, water quality and human health. This background has informed much of her life.

Cathy and her husband Ian, started out in Waterloo but have lived in Toronto, Ottawa, Vancouver and for the past 20 years, have been back in Waterloo. They have three children, Alistair, Peter and Christina.

In 1996 they began to shift their entrepreneurial work to solar energy companies, after Ian assisted on the project to install solar at the 1996 Atlanta Olympics. Cathy and Ian were one of the first in Canada to install a grid tied solar energy system on their home in 2001. Passion about making solar energy a mainstream electricity generator has fueled the creation of a few companies, including ARISE Technologies, which built a solar cell plant in Germany in 2006. Ubiquity Solar, a solar materials company, is creating a pilot plant in Sarnia to further develop and commercialize a process to produce hyper pure silicon for the solar energy industry.

NOTICES

Past President / Section Delegate

From the Fall Leader's Meeting in Louisville there is still a positive drive embellishing the five ISA major goals. The Image and Membership Department has many initiatives on the go engaging the President and Membership Chair with Webinars and presentations.

There are a lot of section and member driven programs that will be pushed out by our membership chair.

From the Council of Society Delegates the motion to increase the dues went through with a majority vote. If your memberships are due soon sign up for multiple years and continue to save. All of the District 13 sections were represented.

Regards

Mike Murray

2016 Reference Guide is available for distribution and can be picked up at the following locations:

Lakeside Process Controls | 581 Vidal St. South | 519.332.2300
WIKI Instruments | 1355 Confederation St. | 519.344.1339
Provincial Controls | 864 Phillips St. | 519.336.7301

PRESIDENT'S MESSAGE

January Message

Dear Friends,

Happy New-Year to you all, hope the holidays have treated you right. I wish that new-year brings good health, peace, prosperity & joy to you and your family. I sure had great holidays in very good weather in India and now back to the basics. In fact, writing this message is the first order of my business in this new-year after I came back from vacation.

I had a chance to talk with some ISA colleagues in India and they are poised to have very growth oriented 2016 for the ISA activities. The local section there had a great year 2015 and had very good participation from their membership for different events and meetings. It is my new-year wish that we have a great ISA year locally here in Sarnia as well with lots of participation from you all.

If you make new-year resolution, make ISA a part of that, attend at least 2-3 section activities/meetings this year. You may also want to think about volunteering on different active committees and section board this year and we are sure to welcome you with open arms. Contact me or any of our executives.

Every year in April, Lambton County Science Fair (LCSF) committee organizes a Science Fair at Lambton College. The fair provides an opportunity to all Lambton County students form grade 3 to 12 to learn more about science and participate by preparing & displaying projects in the field of physical sciences, life sciences, computer & engineering, or earth & environmental sciences. ISA Sarnia section is a big supporter of this event and award prizes & donate money to LCSF committee. I request you to support this event by publicizing to your network and encouraging students you know to participate. This is an entirely volunteer run event and relies on sponsorship from generous donors from this area so you may consider soliciting donations from your work place or other organization you belong to. Contact me if you need more information.

At the up coming Dinner Meeting on January 25, we are going to host a speaker from Ubiquity Solar, who will give us great information about solar industry today and the work that Ubiquity Solar do. As you know solar energy, in general renewable energy, is a big buzz word and there is a lot happening in the industry. Come & join us to know some facts, figures & great networking.

Looking forward to a chance to talk with many of you in person at the various section activities throughout the year.
